Index to
TRANSACTIONS OF THE ASME

Volume 87, 1965

There are five journals issued quarterly: **Journal of Engineering for Power** in January, April, July, and October; **Journals of Engineering for Industry** and **of Heat Transfer** in February, May, August, and November; **Journals of Basic Engineering** and **of Applied Mechanics** (Volume 31) in March, June, September, and December.

A

ABLATION
Ablation of glasses containing a surface-active compound....AM 459
Ablation of reinforced plastic for heat protection....AM 177, (D) AM 951

ABRASIVE MACHINING. *See* GRINDING

ACKERMANN, P. C.
Application of self-excited machine-tool chatter theory: contribution to machine-tool chatter research—4....I 471

ACOUSTICS
Response of a submerged cylindrical shell to an axially propagating step wave....AM 788
Sound radiation from submerged cylindrical shells of finite length....I 393

ACTUATORS. *See* SERVOMECHANISMS

ADAMS, D. P.
Analysis of errors in the double Hooke joint (D)....I 257

ADAMS, PAUL H. (author)
Experimental stress analysis and motion measurement (BR)....AM 238

ADKINS, R. WAYNE
Lubrication phenomena in spur gears: capacity, film thickness variation, and efficiency....B 655

AERODYNAMICS
Flow and interference effects of a body of revolution and its stabilizing surfaces when at a small angle of attack....B 941
On detached shocks for blunt bodies at small angles of attack....AM 271

AIRCRAFT
Analysis of lift augmentation of vertical solid jets in proximity of the ground....AM 263

ALBRECHT, PAUL
Dynamics of the metal-cutting process..I 429

ALDRICH, E. W.
A reappraisal of the critical constants for water....HT 266

ALEXANDER, J. M. (author)
Manufacturing properties of materials (BR)....AM 478

ALFORD, J. S.
Protecting turbomachinery from self-excited rotor whirl....P 333
Shaft whirl induced by rotor internal damping (D)....AM 233

ALLEN, R. E.
Creep and rupture behavior of low-alloy steels in high-pressure hydrogen environment....B 313

ALUMINUM
Plane-strain fracture toughness of high-strength aluminum alloys....B 904

AMANN, CHARLES A.
Slip factor of a radial-bladed centrifugal compressor (D)....P 188

AMBA-RAO, C. L.
On the vibration of a rectangular plate carrying a concentrated mass (AC)....AM 476

AMOS, L. G.
A four-bar linkage adjustable for variable straight-line motions....I 287

AMSLER, ROLF
Slip factor of a radial-bladed centrifugal compressor (D)....P 189

ANGONA, F. A.
Drill-string vibration attenuation and its effect on a surface-oscillator drilling system....I 110

AOKI, MASANAO
On performance losses in some adaptive control systems: 1....B 90
Successive generation of Chebychev approximation solution....B 17

P	Power
I	Industry
HT	Heat Transfer
B	Basic
AM	Applied Mechanics
(D)	Discussion of paper
(AC)	Author's Closure
(BR)	Book Review

APPL, F. C.
Fundamental frequency of simply supported rectangular plates with linearly varying thickness..AM 161, (AC) AM 953

ARCHER, R. R.
On the orthogonality condition of axisymmetric vibration modes for shells of revolution....AM 447, (AC) AM 954
On the vibration and stability of finitely deformed shallow spherical shells..AM 116

ARENZ, R. J.
Two-dimensional wave propagation in realistic viscoelastic materials....AM 303

ARGON
Thermal conductivity of nitrogen and argon....HT 177

ARIARATNAM, S. T.
Vibration of unsymmetrical rotating shafts....AM 157

ARMIENTO, D. F.
Plane-strain fracture toughness of high-strength aluminum alloys....B 904

ARNOLD, G. M.
Radiation from a directional source: beam divergence in solar simulators (D)....P 269

ARPACI, V. S.
Effect of longitudinal oscillations on free convection from vertical surfaces....AM 183, (AC) AM 717

ASHBROOK, R. L.
High-temperature, cobalt-tungsten alloys for aerospace applications....I 9

ASHFORD, W.
Hydrostatic extrusion (D)....I 494

ASTRODYNAMICS. *See* SPACE AND SPACE VEHICLES

ATKINSON, C. P.
Study of the nonlinearly related modal solutions of coupled nonlinear systems by superposition techniques....AM 359

ATTIG, R. C.
Pilot-plant investigation of factors affecting low-temperature corrosion in oil-fired boilers....P 197

AUSMAN, J. S.
Characteristics of herringbone-grooved gas-lubricated journal bearings (D)..B 576
On the behavior of gas-lubricated journal bearings subjected to sinusoidally time-varying loads....B 589

AUSTIN, T. C.
Analysis of errors in the double Hooke joint....I 251

AUTOMATIC CONTROL
The application of computing technique to automatic control systems in metallurgical plant (BR)....I 522
Choice of time for zeroing a disturbance in a minimum-fuel-consumption control problem....B 29
Further results on parametric excitation of a dynamic system...AM 373, ...(D) AM 956

AUTOMATIC CONTROL (*continued*)
An integral method of Liapunov function generation for nonlinear autonomous systems....AM 569
Investigation of optimal control with a minimum-fuel-consumption criterion for a fourth-order plant with two control inputs; synthesis of an efficient suboptimal control....B 39
A method for the determination of the domain of stability of second-order nonlinear autonomous systems (D)....AM 230
Near optimal control in the presence of small stochastic perturbations....B 103
On a problem of Letov in optimal control....B 81
On performance losses in some adaptive control systems: 1....B 90
On the almost sure stability of linear dynamic systems with stochastic coefficients....AM 365
On the control of linear systems with pure time delay....B 74
On the formulation of adaptive optimal control problems....B 125
Optimal bounded control of linear sampled-data systems with quadratic loss....B 135
Optimum nonlinear control for step and pulse disturbances....B 95
Parameter variation problem in state feedback control systems....B 120
Power-transfer characteristics for compressible flow from a stationary nozzle to a detached receiver....B 23
Successive generation of Chebychev approximation solution....B 17

AVITZUR, B.
Analysis of metal extrusion....I 57
Hydrostatic extrusion....I 487
Tube sinking and expanding....I 71

B

BACK, L. H.
On constant-property turbulent boundary layers with variable temperature or heat flow at the wall....HT 151

BACKER, W. R.
Grinding....I 518

BAILEY, N. P.
Energy storage in metals at high pressures....B 385

BAIN, R. W.
Convective mass transfer (BR)....AM 238

BAKER, B. R.
Closed forms for the stresses in a class of orthotropic wedges....AM 26

BAKER, E. J.
Transient heat conduction at high thermal flux....HT 49

BAKER, R. M. L., JR.
Orbital dynamics of space vehicles (BR)....AM 238

BAKER, W. E.
Vibration frequencies for uniform beams with central masses....AM 711

BALACHANDRA, M.
Large deflections of clamped plate by modified Fourier series....AM 943

BALLS. *See* SPHERES

BANKOFF, S. G.
Laminar film condensation on a porous horizontal tube with uniform suction velocity....HT 95

BARCROFT, F. T.
Action of neutral organic phosphates as EP additives....B 761

BARINKA, L. L.
Initial phases of damage to test specimens in a cavitating venturi....B 453

BARKAN, PHILIP
Motion control for a series system of "N" degrees of freedom using numerically derived and evaluated equations (D).I 203
A spring-actuated, cam-follower system: design theory and experimental results .....I 279

BARLOW, E. J.
Externally pressurized foil gas bearings .....B 986

BARON, M. L.
Sound radiation from submerged cylindrical shells of finite length.....I 393

BARONET, C. N.
Apparatus for measuring thrust produced on rotating body immersed in a liquid .....AM 201, (AC) AM 953

BARRON, R. F.
Heat and mass transfer to a cryosurface in free convection.....HT 499

BARS. *See also* STRESS AND STRAINS
An elastic-plastic curved-bar analysis .....B 894
Impact buckling of a thin bar.....AM 315
Torsion of inhomogeneous elastic prismatic bars.....I 391
Vibration frequencies of tapered bars and circular plates (D).....AM 234

BAUDRY, R. A.
Low-cycle fatigue life of turbine-generator retaining rings determined by stress-cycling tests.....B 245

BAUER, FRANCES
Bending of rectangular plates with finite deflections.....AM 821

BAUER, LOUIS
Bending of rectangular plates with finite deflections.....AM 821

BAXTER, I.
Determination and significance of gaseous-fuel octane numbers.....P 166

BAYLEY, F. J.
Heat transfer characteristics of the closed thermosyphon.....HT 30

BAYLOR, J. L.
Sandwich shells of arbitrary shape (D) .....AM 232

BEACHEM, C. D.
Electron fractographic studies of mechanical fracture processes in metals .....B 299

BEAMS
An approximate analysis of deflections of beams in creep bending.....B 899
Dynamic response of beams with lumped parameters.....AM 453
Large deformation of a rigid, ideally plastic cantilever beam.....AM 295
On the bending problem of prismatical beam by terminal transverse load .....AM 210
On the free vibration of a beam on a nonlinear elastic foundation.....AM 445
Plastic deformation of impulsively loaded straight clamped beams.....AM 7
Rigid-plastic beams under uniformly distributed impulses.....AM 481
Transverse vibration of an Euler beam carrying a system of heavy bodies.AM 434
Traveling force on a Timoshenko beam .....AM 351
Vectorial derivation of the equations for small vibrations of twisted curved beams.....AM 439
Vibration frequencies for uniform beams with central masses.....AM 711

BEARINGS. *See also* LUBRICANTS AND LUBRICATION
An approximate solution for the infinitely long, gas-lubricated slider bearing .....B 1085
Bearing materials and solid lubricants .....B 795
Characteristics of herringbone-grooved gas-lubricated journal bearings.....B 568
Contributions to the determination of the real clearance in sliding bearings.....B 781
Design and performance of gas-pressurized, spherical, space-simulator bearings.....B 604
Dynamically loaded journal bearings; mobility method of solution.....B 537
Effect of external pressurization on self-acting foil bearings.....B 631
Externally pressurized bearings with inherent friction compensation....AM 285
Externally pressurized foil gas bearings .....B 986
Fretting corrosion caused by vibration with rolling bearings stationary.....B 713
Frictional characteristics of liquid hydrostatic journal bearings.....B 163
Gas-lubricated bearings (BR).....AM 718
Gas-lubricated stepped thrust bearing—a comprehensive study.....B 213
Investigation of a partial-arc pad bearing in the superlaminar flow regime..B 145, ...(D) B 1090
An investigation of self-acting foil bearings.....B 837

BEARINGS (*continued*)
Linearized PH stability theory for finite length, self-acting, gas-lubricated, plain journal bearings.....B 559
Magnetohydrodynamic parallel-plate slider bearing.....B 778
Magnetohydrodynamic squeeze-film bearings.....B 805
Misalignment torques of hydrodynamic gas-lubricated journal bearings....B 193
On hydrodynamic instability of gas-lubricated journal bearings.....B 579
On the behavior of gas-lubricated journal bearings subjected to sinusoidally time-varying loads.....B 589
Pressurized fixed-orifice gas journal bearing in plane vibration.....B 264
The role of microslip for freely rolling bodies.....B 724
The short gas-lubricated journal bearing .....B 1087
Solution of the stability problem for 360 deg self-acting, gas-lubricated bearings.....B 199
Stability analysis of gas-lubricated, self-acting, plain, cylindrical, journal bearings of finite length, using Galerkin's method.....B 185
Static and dynamic characteristics of the spiral-grooved thrust bearing.....B 547
Study of anisothermal short journal bearings with non-Newtonian lubricants.....AM 781
Theoretical solution as a boundary-value problem for externally pressurized porous gas bearings.....B 622
Theory of externally pressurized circular thrust porous gas bearing.....B 613
Theory of the infinitely wide, perfectly flexible, self-acting foil bearing.....B 831
Thermal effects in contact fatigue under oscillatory normal load.....B 177
Thermal wedge lubrication of parallel surface thrust bearings.....B 823
Torque produced by misalignment in short lubricated bearings.....B 847
A variational principle applied in the plane slider bearing.....B 1081

BECK, J. V.
Inverse problems in transient heat conduction (D).....AM 472

BECKER, E. C. H.
Vibration frequencies of tapered bars and circular plates (AC).....AM 235

BECKER, HERBERT
A bonded grip polariscope for photoviscoelasticity.....AM 702

BECKER, WILLIAM
Bending of rectangular plates with finite deflections.....AM 821

BECKERS, A.
Investigations of forced-convection liquid-cooled gas-turbine blades (D) .....P 70

BECKETT, R. E.
Experimental determination of the elastic behavior of orthotropic plates (D)...I 317

BECKMAN, W. A.
A photographic study of boiling in an accelerating system.....HT 374

BEER, F. P.
On the distribution of rises and falls in a continuous random process.....B 398

BEGGS, J. S.
An iterative method for the displacement analysis of spatial mechanisms (D).AM 220
Application of dual-number quaternion algebra to the analysis of spatial mechanisms (D).....AM 221

BELL, J. C.
A numerical solution for the pressure, temperature, and film thickness between two infinitely long, lubricated rolling and sliding cylinders, under heavy loads (D).....B 704

BELLMAN, RICHARD
Differential- und integral-ungleichungen (BR).....AM 477

BEN-AMOZ, M.
On a variational theorem in coupled thermoelasticity.....AM 943

BENDING. *See also* DEFORMATION
An approximate analysis of deflections of beams in creep bending.....B 899
Bending of rectangular plates with finite deflections.....AM 821
On nonlinear bending of a plate strip...I 406

BENEDICT, R. P.
Flow with losses.....P 37

BENJAMIN, T. B.
Significance of the vortex breakdown phenomenon.....B 518, (AC) B 1091

BENNETT, J. A.
A set of fatigue failure criteria (D)....B 342

BENNETT, M. D.
Fluid-metering device for measuring dive rate of a vehicle traveling in water .....B 58

BERNSTEIN, E. L.
On large-deflection theories of plates .....AM 695

BERT, CHARLES W.
Plastic tensile instability in pressurized shells of revolution.....AM 449

BEVANS, J. T.
Radiation exchange in an enclosure with directional wall properties.....HT 388

BIEBER, H. E.
Effect of oxidation on boundary friction of steel in hydrocarbon media and critical friction duties under which cold and hot seizure (or welding) develop (D).....B 745

BIHELLER, H. JOSEPH
Radial force on the impeller of centrifugal pumps with volute, semivolute, and fully concentric casings.....P 319

BIOT, M. A. (author)
Mechanics of incremental deformation (BR).....AM 957

BIRD, G. A.
Finite wave propagation in deformable tubes.....AM 207

BIRKEBAK, R.
Film-cooling effectiveness with injection through a porous section (D)....HT 360

BIRKEBAK, R. C.
Effects of roughness of metal surfaces on angular distribution of monochromatic reflected radiation.....HT 85

BISHOP, A. A.
Heat transfer to supercritical water in smooth-bore tubes (D).....HT 483

BLATHERWICK, A. A.
High-temperature rupture, fatigue, and damping properties of AISI Designation 616 (type 422 stainless) steel.....B 325

BLACKSHEAR, P. L., JR.
Experimental measurements of mass transfer from a rotating disk in a uniform stream.....HT 422

BLEICH, H. H.
Longitudinal impact of a semi-infinite, cylindrical, viscoelastic shell.....AM 813

BLOK, HARMEN
Measurement of surface temperatures on gear teeth (D).....B 651

BOBCO, R. P.
Radiation from a directional source: beam divergence in solar simulators.P 259

BODGER, W. K.
An experiment with aspect ratio on a means of extending the useful range of a transonic inlet stage of an axial-flow compressor (D).....P 123
Protecting turbomachinery from self-excited rotor whirl (D).....P 343

BODLEY, W. E.
Finite wave propagation in deformable tubes.....AM 207

BOGDANOFF, J. L.
Further results on parametric excitation of a dynamic system (D).....AM 956

BOGNER, F. K.
On the orthogonality condition of axisymmetric vibration modes for shells of revolution.....AM 447, (AC) AM 954

BOILER CORROSION. *See also* CORROSION
Boiler flue-gas measurements using a dewpoint meter.....P 8
Fuel-ash corrosion and its effect on boiler design.....P 210
Gas-side corrosion in coal and oil-fired utility units.....P 250
Pilot-plant investigation of factors affecting low-temperature corrosion in oil-fired boilers.....P 197
Prevention of residual oil combustion problems by use of low excess air and magnesium additive.....P 229

BOILERS
Elimination of destructive, self-excited vibrations in large, gas and oil-fired utility units.....P 223
Hydrogen evolution and steam dissociation in steam generators.....P 405

BOILING
Correlation of sound generation and heat transfer in boiling.....HT 436
Measured temperature profiles within the superheated boundary layer above a horizontal surface in saturated nucleate pool boiling of water....HT 333
Numerical techniques for boiling flow stability analyses.....HT 311
A photographic study of boiling in an accelerating system.....HT 374
Photographic study of nucleate pool boiling on a horizontal surface.....HT 17
Subcooled swirl-flow boiling and burnout with electrically heated twisted tapes and zero wall flux.....HT 342

BOLEY, B. A. (editor)
High-temperature structures and materials (BR) ..... I 521

BOLOTIN, V. V. (author)
Dynamic stability of elastic systems (BR) ..... AM 718

BONAMY, S. E.
Development and application of nomographs for an analysis of compression-ignition engines ..... P 148

BONDS
Dynamic bond stress in a composite structure subjected to a sudden pressure rise ..... AM 643

BOOK REVIEWS
Advances in chemical physics, vol. 5 ..... AM 238
Books on material processing ..... I 521
Convective mass transfer ..... AM 238
Differential- und integral-ungleichungen ..... AM 477
Dynamic stability of elastic systems ..... AM 718
Elastic liquids ..... AM 477
Elasticity in engineering mechanics ..... AM 958
Experimental stress analysis and motion measurement ..... AM 238
Fundamentals of gas dynamics ..... AM 479
Gas-lubricated bearings ..... AM 718
Grenztragfahigkeits theorie der platten ..... AM 239
Handbook of mathematical functions with formulas, graphs, and mathematical tables ..... AM 239
Heat transfer, thermodynamics, and education. Boelter Anniversary volume ..... AM 477
Hydrodynamics in theory and application ..... AM 958
Introduction to plasma physics ..... AM 479
Kinematic synthesis of linkages ..... AM 477
Linearized analysis of one-dimensional magnetohydrodynamic flows ..... AM 718
Manufacturing properties of materials ..... AM 478
Mechanical design and systems handbook ..... AM 478
Mechanics of incremental deformation ..... AM 957
Orbital dynamics of space vehicles ..... AM 238
Progress in solid mechanics, vol. 4 ..... AM 478
Radioisotopic power generation ..... AM 958
Structure and property of materials, vol. 1; Thermodynamics of structure, vol. 2 ..... AM 718
Tensors in mechanics and elasticity ..... AM 238
Three-dimensional problems of elasticity ..... AM 477

BOOKER, J. F.
Dynamically loaded journal bearings: mobility method of solution ..... B 537
A table of the journal-bearing integral ..... B 533

BOON, G. B.
Fixed tube-sheet heat exchangers (AC) ..... AM 236

BORESI, A.
Buckling of a long fiber-wound cylindrical shell due to stresses caused by windings ..... AM 81

BORESI, A. P. (author)
Elasticity in engineering mechanics (BR) ..... AM 958

BORSOFF, V. N.
Measurement of surface temperatures on gear teeth (D) ..... B 653

BOTTEMA, O.
Acceleration axes in spherical kinematics ..... O 150
Application of dual-number quaternion algebra to the analysis of spatial mechanisms (D) ..... AM 222
On the existence of a cycloidal Burmester theory in planar kinematics (D) ..... AM 717

BOUILLON, GRATIEN
On polygonal action in roller chain drives ..... I 243

BOULGER, F. W.
Plastic working of metals ..... I 516

BOUNDARY LAYERS. *See also* FLOW OF FLUIDS
An analytical and experimental study of the plane, incompressible, turbulent free-shear layer with arbitrary velocity ratio and pressure gradient ..... B 421
Artificially produced boundary layer ..... B 1079
Laminar boundary layers and their separation from curved surfaces ..... B 483
A method of solving supersonic laminar boundary-layer separation and its application to wedges and curved surfaces ..... AM 747
A study of linearized approximations to the boundary-layer equations ..... AM 757
A theoretical analysis of laminar forced flow and heat transfer about a rotating cone ..... HT 184
Turbulent boundary-layer growth in annular diffusers ..... B 535

BOURDON TUBES. *See* INSTRUMENTS, PRESSURE-MEASURING

BOWIE, O. L.
Rectangular tensile sheet with symmetric edge cracks (AC) ..... AM 237
Single edge crack in rectangular tensile sheet ..... AM 708

BREWER, H. C. (author)
Manufacturing properties of materials (BR) ..... AM 478

BRIDGEMAN, D. C.
A reappraisal of the critical constants for water ..... HT 266

BRIERLY, R. G. (author)
Machine principles and cost control (BR) ..... I 522

BRIGHTON, J. A.
Artificially produced boundary layer ..... B 1079

BRILLOUIN, LEON (author)
Tensors in mechanics and elasticity (BR) ..... AM 238

BROCKLEY, C. A.
Thermal wedge lubrication of parallel-surface thrust bearings ..... B 823

BROSENS, PIERRE J.
Solar thermionic generators for space power ..... P 281

BROWN, E. D., JR.
Antiwear and antifriction properties of polyorganosiloxanes and their mixtures with hydrocarbons (D) ..... B 752

BROWN, F. T.
Pressure surges in magnetoviscous flow (D) ..... B 482
Step responses of liquid lines with frequency-dependent effects of viscosity ..... B 504

BROWN, R. D.
Bearing materials and solid lubricants ..... B 795

BROWN, R. H.
Deformation during chip formation ..... I 53

BRULL, M. A.
On the solution to transient coupled thermoelastic problems by perturbation techniques ..... AM 389

BUBBLES. *See also* BOILING
Cavitation bubble collapse in viscous, compressible liquids—numerical analysis ..... B 977
On the mechanics of vapor bubble collapse ..... HT 209
A photographic study of the dynamics and damage capabilities of bubbles collapsing near solid boundaries ..... B 511
Some analytical aspects of bubble dynamics ..... B 991

BUCKLING
Axisymmetrical creep buckling of clamped shallow spherical shells ..... AM 323
Buckling of a long fiber-wound cylindrical shell due to stresses caused by windings ..... AM 81
Buckling of axially compressed circular cylindrical shells at stresses smaller than the classical critical value ..... AM 542
Buckling of circular plate on elastic foundation ..... I 323
Buckling of structural elements subject to surface shears ..... AM 194
Dynamic axisymmetric buckling of shallow conical shells subjected to impulsive loads ..... AM 129
Dynamic plastic buckling of a thin cylindrical shell containing an elastic core ..... AM 803
Effect of boundary conditions on the buckling of conical shells under hydrostatic pressure ..... AM 208
Impact buckling of a thin bar ..... AM 315
Invariant imbedding applied to eigenvalue problems in mechanics ..... AM 47
Low buckling stresses of axially compressed circular cylindrical shells of finite length ..... AM 533
Nonlinear elastic buckling and parametric excitation of a cylinder under axial loads ..... AM 109
Nonlinear model study of the thermal buckling of thin elastic shells ..... AM 71
On the buckling of rings subject to impulsive pressures ..... AM 511
Preferred mode shape in the linear buckling of circular cylindrical shells under axial compression ..... AM 793
A survey of methods of stability analysis of ring-stiffened cylinders under hydrostatic pressure ..... I 385
Torsional buckling of an extended twisted cylindrical rod under one-sided constraint ..... AM 519
Unsymmetric buckling of thin shallow spherical shells (D) ..... AM 466

BULKELEY, P. Z.
Axisymmetric, transverse vibrations of a spinning membrane centrally clamped between collars ..... I 530

BUMP, T. R.
Surface temperatures of infinite plates subjected to sudden environment temperature changes ..... HT 526

BURGREEN, D.
Efficiency of pumping and power generation in ultrafine electrokinetic systems ..... AM 675

BURTON, R. A.
Analysis and test of the screw seal in laminar and turbulent operations (D) ..... B 1091
Bearing materials and solid lubricants ..... B 795
Investigation of a partial-arc pad bearing in the superlaminar flow regime (D) ..... B 1090
A linearized turbulent lubrication theory (D) ..... B 682
Thermal effects in contact fatigue under oscillatory normal load ..... B 177

BUTTON, M. J.
Experiments on room-temperature Nernst-Ettingshausen refrigerators ..... I 21

BÜYÜKTÜR, A. R.
Heat transfer across a linearly accelerated or decelerated laminar boundary layer ..... HT 403

BYERS, N. R.
Fundamental frequency of simply supported rectangular plates with linearly varying thickness ..... AM 161, (AC) AM 953

C

CALLAN, P. C.
Basic analysis of pressure-control systems used on large steam turbine-generator units ..... P 389

CAMPBELL, J. S.
Books on material processing (BR) ..... I 521

CAPRIZ, G.
Torque produced by misalignment in short lubricated bearings ..... B 847

CARACRISTI, V. Z.
Prevention of residual oil combustion problems by use of low excess air and magnesium additive ..... P 229

CARAMEROS, ALEX
Turbocharged two-stroke-cycle gas engines ..... P 421

CARDEN, A. E.
Thermal fatigue of a nickel-base alloy ..... B 237

CARGILL, R. W.
Bureau of Mines progress in developing the coal-burning gas-turbine power plant ..... P 215

CARLUCCI, N. A.
Flow with losses ..... P 37

CARMAN, C. M.
Plane-strain fracture toughness of high-strength aluminum alloys ..... B 904

CARR, R. B.
Experimental and analytical investigation of the film-conductance-coefficient boundary condition for thermal shock of a conical shell ..... AM 690

CARREKER, R. P., JR.
Dip-forming process (D) ..... HT 12

CARVER, J. R.
Heat transfer to supercritical water in smooth-bore tubes ..... HT 477

CASTELLI, V.
Solution of the stability problem for 360 deg self-acting, gas-lubricated bearings ..... B 199

CAUGHEY, T. K.
Classical normal modes in damped linear dynamic systems ..... AM 583
On the almost sure stability of linear dynamic systems with stochastic coefficients ..... AM 365
Parametric excitation of a nonlinear system ..... AM 899

CAVITATION. *See also* PUMPS, CENTRIFUGAL
Cavitation bubble collapse in viscous, compressible liquids—numerical analysis ..... B 977
Effect of surface roughness on cavitation performance of hydrofoils—Report 1 ..... B 495
An experimental study of accelerated cavitation induced by ultrasonics ..... B 967
General formulation of a perturbation theory for unsteady cavity flows ..... B 1006
Initial phases of damage to test specimens in a cavitating venturi ..... B 453

CESS, R. D.
Heat transfer, thermodynamics and education. Boelter anniversary volume (BR) ..... AM 477

CHACE, MILTON A.
Solutions to the vector tetrahedron equation ..... I 228

CHAIKIVSKY, M.
Low-excess-air combustion of heavy fuel—high-temperature deposits and corrosion ..... P 379

CHAMBERS, J. T.
A dual-element transducer for measuring high gas-stream temperatures ..... HT 397

CHAMBERS, R. L.
Fuels for advanced power-generation systems....P 125

CHANAUD, R. C.
Significance of the vortex breakdown phenomenon (D)....B 522

CHANDRASEKARAN, H.
Photoelastic analysis of tool-chip interface stresses....I 495

CHANG, R. C. C.
Optimum nonlinear control for step and pulse disturbances....B 95

CHAO, B. T.
End-wall heat transfer in a rarefaction wave tube....HT 349
On the mechanics of vapor bubble collapse....HT 209
Thermal contact resistance in a vacuum environment....HT 243
Unsteady stagnation point heat transfer ....HT 221

CHATO, J. C.
Condensation in a variable acceleration field and the condensing thermosyphon ....P 355
Pressure distribution and heat transfer for flow over simulated cylindrical parachutes (D)....HT 525

CHEMICAL PHYSICS. *See* PHYSICS

CHEN, T. S.
Film-cooling effectiveness with injection through a porous section....HT 353

CHENEY, J. A.
Deflection of a curved shaft due to torque....AM 215

CHENG, H. S.
A numerical solution for the pressure, temperature, and film thickness between two infinitely long, lubricated rolling and sliding cylinders, under heavy loads....B 695
Stability analysis of gas-lubricated, self-acting, plain, cylindrical, journal bearing of finite length, using Galerkin's method....B 185

CHENG, K. C.
Laminar heat transfer in noncircular ducts by Moiré method....HT 308

CHIDA, I.
Effect of surface roughness on cavitation performance of hydrofoils—Report 1....B 495

CHILDS, G. D.
Boiler flue-gas measurements using a dewpoint meter....P 8

CHIN, J. H.
Anisotropic, multiple scattered radiation from an arbitrary, cylindrical source in an infinite slab....HT 167

CHOU, P. C.
Longitudinal impact on viscoplastic rods—linear stress-strain rate law (D) ....AM 226
Upper bounds and Saint-Venant's principle for incompressible potential-flow fields....AM 661

CHOW, C. Y.
Characteristics of herringbone-grooved gas-lubricated journal bearings....B 568

CHU, C. M.
Effect of anisotropic scattering on radiant transport....HT 381

CHU, N. C.
Heat transfer across vertical layers ....HT 110

Fixed tube-sheet heat exchangers (AC)....AM 236

WALTER, WOLFGANG (author)
Differential- und integral-ungleichungen (BR)....AM 477

WANG, CHIU-SEN
Optimization of step rockets by the discrete-maximum principle....I 419

WANG, D. P.
General formulation of a perturbation theory for unsteady cavity flows....B 1006

WANG, I-CHIH
A contact-stress problem for a rigid smooth sphere in an extended elastic solid....AM 651

WANOUS, D. J.
Heat transfer for flow longitudinal to a cylinder with surface mass transfer....HT 317

WARREN, W. E.
Note on the transient axisymmetric thermoelastic problem for the solid sphere (AC)....AM 226
Thermal-stress concentrations in a notched half-plane....AM 192

WATER
A reappraisal of the critical constants for water....HT 266
Water analyses and their functions in selecting condenser tube alloys....P 329

WATTS, R. G.
Radiant heat transfer to earth satellites....HT 369

WAVE MECHANICS. *See also* VIBRATION
Blast-wave propagation in hydraulic conduits....P 19, (D) P 439
Elastic wave propagation in rods of arbitrary cross section....AM 290
Finite wave propagation in deformable tubes....AM 207
A note on wave propagation in a nonhomogeneous bar....AM 947
Stress waves generated by heat addition in an elastic solid....AM 143
Traveling force on a Timoshenko beam....AM 351
Two-dimensional wave propagation in realistic viscoelastic materials....AM 303
Wave propagation in a thin cylindrical shell....AM 346
Wave propagation in an elastic nonhomogeneous bar of finite length....AM 135

WAY, S.
Fuels for advanced power-generation systems....P 125

WAYMAN, C. M. (author)
High-temperature structures and materials (BR)....I 521

WEAR
Calculation of wear rate....B 785
Friction and wear....B 791

WEDGES
Closed forms for the stresses in a class of orthotropic wedges....AM 26

WEERTMAN, J. R. (author)
High-temperature structures and materials (BR)....I 521

WEIGHTS AND MEASURES
A reappraisal of the critical constants for water....HT 266

WEINER, R. S.
Forced axisymmetric motions of circular elastic plates....AM 893

WEISS, VOLKER
Interaction effect of neighboring holes or cavities, with particular reference to pressure vessels and rocket cases (D)....B 885

WEITSMAN, YECHIEL
Couple-stress effects on stress concentration around a cylindrical inclusion in a field of uniaxial tension....AM 424, (AC) AM 955

WELLING, JOHN R.
Free-convection heat transfer coefficients from rectangular vertical fins....HT 439

WELNA, H.
Tip-clearance effects in centrifugal pumps....B 932

WEMPNER, G. A.
Theory for moderately large deflections of thin sandwich shells....AM 76

WEN, ROBERT K.
Dynamic response of beams with lumped parameters....AM 453

WENG, CHENG-KUO
Power-transfer characteristics for compressible flow from a stationary nozzle to a detached receiver....B 23

WENG, TU-LUNG
Thermal stresses in anisotropic hollow cylinders....B 391

WENNBERG, J. L.
Books on material processing (BR)....I 521

WERNICK, R. J.
Solution of the stability problem for 360 deg self-acting, gas-lubricated bearings (D)....B 211

WEST, R. G.
An investigation into the performance of two ISA metering nozzles of finite and zero area ratio (D)....B 531

WESTMANN, R. A.
Asymmetric mixed boundary-value problems of the elastic half-space....AM 411

WHIRL. *See* ROTORS

WHITTIER, J. S.
A note on wave propagation in a nonhomogeneous bar....AM 947

WIEDERSUM, G. C.
Corrosion of feedwater heater tubing alloys in peaking service....P 324
Gas-side corrosion in coal and oil-fired utility units....P 250

WILCOCK, D. F.
Contributions to the determination of the real clearance in sliding bearings (D)....B 784
Design and performance of gas-pressurized, spherical, space-simulator bearings....B 604

WILDMANN, M.
Effect of external pressurization on self-acting foil bearings....B 631
Gas-lubricated, stepped thrust bearing—a comprehensive study....B 213

WILHOIT, J. C., JR.
Analysis of the motion of deep-water drill strings—part 1: forced lateral motion....I 137
Analysis of the motion of deep-water drill strings—part 2: forced rolling motion....I 145

WILKINS, J. E., JR.
Frictional pressure drop in triangular ducts....HT 427

WILKINSON, J. P.
On nonsymmetric dynamic problems of elastic spherical shells....AM 525

WILLIAMS, M. L.
Bending of plates of dissimilar materials with cracks (D)....AM 464

WILLIAMS, W. O.
Torsional buckling of an extended twisted cylindrical rod under one-sided constraint....AM 519

WILSON, D. G.
Slip factor of a radial-bladed centrifugal compressor (D)....P 191

WILSON, F. W. (editor)
Die design handbook (BR)....I 522

WILSON, G. F.
Books on material processing (BR)....I 521
Study of the radiometric method and use of the liquid scintillation technique for tool-wear determination....I 47

WILSON, G. R.
Action of neutral organic phosphates as EP additives (D)....B 769

WILSON, J. T., III
Analytical kinematic synthesis by finite displacements....I 161

WILSON, PAUL E.
Finite deformation of a pressurized membrane strip....AM 451
On nonlinear bending of a plate strip....I 406

WIND TUNNELS
Transient heat transfer through a thin circular pipe due to unsteady flow in the pipe....HT 513

WISE, W. W.
An analysis of axially symmetric coupled tube sheets (D)....AM 473

WOLF, L. J.
Role of stress concentration in the fatigue of Delrin....I 319

WOJCIK, C. K.
Synthesis of four-bar-linkage function generators by means of equations of motion....I 170

WOJTOWICZ, W. J.
Metalworking lubricants....B 800

WOLOSEWICK, R. M.
Transient response in a viscoelastic material with temperature-dependent properties and thermomechanical coupling....AM 620

WONHAM, W. M.
On a problem of Letov in optimal control....B 81

WOOD, G. M.
Tip-clearance effects in centrifugal pumps....B 932

WOOLDRIDGE, C. B.
Free-convection heat transfer coefficients from rectangular vertical fins....HT 439

WRIGHT, A.
Effect of external pressurization on self-acting foil bearings....B 631
WRIGHT, C. P.
Some design techniques for fluid-jet amplifiers....B 67
WU, CHIEN-HENG
On the contact problem of thin circular rings....AM 11
WU, TAI TE
On the parametrization of the elastic moduli of two-phase materials ....AM 211, (AC) AM 954
WU, T YAO-TSU
General formulation of a perturbation theory for unsteady cavity flows....B 1006
WULFF, JOHN (editor)
Structure and property of materials, vol. 1; thermodynamics of structure, vol. 2 (BR)....AM 718
WYLIE, E. B.
Pressure transients in viscous fluid systems....B 1089
Reflection of waterhammer pressure waves from minor losses (D)....B 451
Resonance in Bersimis no. 2 piping system....B 925
Resonance in pressurized piping systems ....B 960

Y

YABE, H.
Theoretical solution as a boundary-value problem for externally pressurized porous gas bearings....B 622
Theory of externally pressurized circular thrust porous gas bearing....B 613
YANG, A. T.
Application of dual-number quaternion algebra to the analysis of spatial mechanisms (AC)....AM 223
Static force and torque analysis of spherical four-bar mechanisms....I 221
YANG, WEN-JEI
Free convective flow of Bingham plastic between two vertical plates....HT 319
Interfacial heat and mass transfer in a suddenly pressurized binary liquid-vapor system....I 413
Possible similarity solutions for heat and mass-transfer equations in logarithmic spiral flows....AM 454
YAO, JOHN C.
Bending due to ring loading of a cylindrical shell with an elastic core....AM 99
Nonlinear elastic buckling and parametric excitation of a cylinder under axial loads....AM 109
YEH, HSUAN
On detached shocks for blunt bodies at small angles of attack....AM 271
YEH, HSU-CHIEH
Free convective flow of Bingham plastic between two vertical plates....HT 319
YOUNG, F. J.
Calculation of surge pressures in pipelines carrying viscous liquids in laminar flow....B 266
Distortion of short pulses in tapered-tube pulse transformers. Part 1—inviscid liquid....B 465
Distortion of short pulses in tapered-tube pulse transformers. Part 2—viscous liquid....B 471
YOUNG, W. E.
Fuels for advanced power-generation systems....P 125
YOUNG, W. T.
Pressure surges in magnetoviscous flow ....B 478
YOVANOVICH, M. M.
On the mechanism of contact between metal surfaces—the penetrating depth and the average clearance (D)....B 673
YU, YI-YUAN
On the form of variationally derived shell equations (D)....AM 469
YUAN, S. W.
Laminar pipe flow with mass-transfer cooling....HT 252

Z

ZAID, M.
An analysis of axially symmetric coupled tube sheets (D)....AM 474
ZAKER, T. A.
Stress waves generated by heat addition in an elastic solid....AM 143
ZERKLE, R. D.
Transient temperature distribution in a slab subject to thermal radiation ....HT 117
ZIMMERMAN, JOHN R.
Analytical synthesis of function generators using the slider-crank inversion (D)....I 330
An iterative method for the displacement analysis of spatial mechanisms (D) ....AM 220
ZUBER, N.
Average volumetric concentration in two-phase flow systems....HT 453
